Trello tasks (20 points)	
*Team Wolves - Healthcare Services in Carrollton	Trello*	
Creating Survey (15 points)	
Create a survey for me to understand users of a website that I have to build to provide healthcare information in carrolton GA only to people of ages 18-70 *so that I can create user persona and user need statements.*	
https://www.surveymonkey.com/r/82SZBHM	
Interview users	
Age of the individual	*25*
Gender of the individual	*female*
Interview questions and answers (insert more rows below if you have more than 5 questions) (30)	
When you need healthcare information in Carrolton, GA, what do you usually do first?	*Look up best providers in for whatever I need, nephrologist, for example.*
What has been your biggest frustration when trying to find healthcare services or information locally?	*Finding one that has good reviews and it available in a good timeframe.*
What makes you trust a healthcare facility?	*Good reviews, and common partners with hospitals.*
What device do you usually use to look up healthcare information?	*My phone most of the time.*
If a website existed specifically for healthcare in Carrolton, GA, what would you want to include?	*Appointment Booking, Insurance Filtering, telehealth support/info, and most importantly, cost transparency.*
User Need Statements (list 5 statements) (20)	
Carrolton residents need an easy way to find doctors and clinics because searching multiple websites is confusing and takes a long time.	
Carrolton residents need clear information about which providers accept their insurance and approximate costs.	
Carrolton residents need information that is easy to access regardless of device type since they are often on the go and using smaller devices when looking up this information.	
Carrolton residents need simple guidance on which facility they should be visiting based off what complications they are experiencing because they are unsure which is appropriate in life/non-life threatening situations.	
Carrolton residents need information that is credible and locally relevant because they are tired of searching through hundreds of irrelevant practices.
